June 11, 1976

Mr. Weisberg,

Here are Powell photos and enlargement. (from negatives of 2nd generation)

Please advise me about results of:

(a) your renewed FOI suit for spectrographic data

(b) your friend's enhancement work on these pictures.

Wallace Milam

P.S. I have a "reliable rumor" that within a couple of months, it will be shown that joints in Oswald's hand were broken to allow forging of palmprint wrapped around rifle. It is believed this was done on Monday, November 25, when a number of FBI agents attended the body, with their "crime kits." (see Ft. Worth newspapers of that time). Cannot tell you any more about this now.
